Software Developer

HTML | CSS/SASS | JavaScript | TypeScript | Python/FastAPI | C#/.NET | React | Next | Vue | React Native | Redux | Node/Express | Nest | Firebase | MongoDB | PostgreSQL | SQL | Git | Jest (TDD) | Docker | Bash | GitHub Actions (CI/CD) | Scrum

A passionate individual with the aim to be on the edge and always learn and experiment using new technologies whether that's front-end or back-end development. Experienced in working with React and React Native applications using Typescript and backend development using C#/.Net and Node/Express. A versatile programmer with an interest in software development.

WORK EXPERIENCE

Redmind - Stockholm, Sweden

08/2022 – 05/2023

Front-end Developer (Intern)

Worked as a front-end developer for Feelgood AB, a healthcare project of Redmind.

- Collaborated closely with senior developers and designers to enhance the Feelgood app.
- Utilized React Native and Typescript to fix bugs and implement new features.
- Improved the app's existing logic and optimized/refactored old redundant code.
- Developed and implemented a user experience reporting system, which sends reports to an admin dashboard for tracking user satisfaction with the app.

DisplayedWeb - Stockholm, Sweden

04/2022 - 12/2022

Web Developer

Worked as a web developer for DisplayedWeb.

- Entrusted with significant responsibility as a web developer at the company.
- Played a crucial role in implementing web designs using ElementorPro.
- Developed and implemented the Content Management System (CMS) using ElementorPro and WordPress.
